Projects

Note Keeping Application | MERN

March 2024 - May 2024

- Built a note management platform allowing users to create, edit, delete, organize personal notes with account-based access.
- Implemented CRUD operations with a secure authentication system, connected front-end and back-end using RESTful APIs.
- Enhanced note-taking efficiency by **30%** through advanced text formatting and streamlined data handling.
- GitHub Repository Link: <https://github.com/Avinash-706/Note.me>

E-Commerce Website | HTML, CSS, JS

April 2023 - May 2023

- Led a team in developing a grocery platform for a paid client, enabling product browsing, search, and secure purchases.
- Integrated front-end with back-end APIs, adding cart management, order tracking, and email notifications using EmailJS.
- Attracted 600+ users in the first month, increasing customer engagement and boosting monthly revenue of client by 10%.
- Hosted URL :- <https://ecommerce-new-wc8i.onrender.com/>
- GitHub Repository Link: <https://github.com/Avinash-706/Ecommerce-new>

ATM Management System | Python

September 2022 - November 2022

- Created a CLI tool for banking operations like balance check, withdrawal, deposit, transfer, and PIN change.
- Facilitated secure PIN verification with transaction tracking for account management.
- Deployed quick navigation through a user-friendly, menu-driven interface.
- GitHub Repository Link: <https://github.com/Avinash-706/ATM-Management-System>
